

## **Keeping you healthy while caring for your eyes!**

- All staff members must wear a face mask, and face shields are worn when appropriate.
- Each staff member has temperature taken upon arrival in the morning. Anyone with a temperature over 100.4 degrees will be sent home, and the office disinfected.
- We have advanced our disinfection protocol throughout the office to include UV-C disinfection, as well as bleach and alcohol.
- All surfaces and materials that patients have contacted are thoroughly cleaned before the next exam.
- We carefully sterilize all frames after each use.
- Patients wait in their cars until an exam room is available. Once called in, they are required to wash their hands, have glasses cleaned and then promptly taken to pre-testing and the exam room.
- Eye wear is delivered curbside with limited in-office adjustments in an isolated area.
- Our goal is to be efficient and thorough with each patient to minimize time and contact with others in the office.
